

Halloween Treats without SCARY ingredients!

HORRIFYING INGREDIENTS:

High fructose corn syrup
Artificial colors & flavors
Nutrisweet, Splenda and artificial sweeteners
GMOs (genetically modified organisms)

Most Halloween candy is loaded with sugar and chemical ingredients. Eating too much sugar can not only cause a tummyache, but it can lower the immune response leaving a child pre-disposed to illness. That's why we recommend non-food or healthier food options.

Fun Halloween Treats

Playdough

Pencils

Erasers
